Paris 15th, France

15 years in digital · ~20 projects run in parallel · 4 products shipped in 2026

PROFILE

AT A GLANCE

Production manager with 15 years of experience in digital at the Imagence agency: running a portfolio of some twenty concurrent projects and teams distributed across several countries, for clients in the mutual insurance, healthcare and pharma sectors. **Since 2026 I have been leading the agency's AI transformation:** tooling and roll-out of AI assistants to all staff, governance of access and write permissions, team enablement. I first put the approach to the test myself by shipping four AI-assisted products (see Projects). A production manager who has stayed hands-on with code, able to measure the gain before mandating it.

EXPERIENCE

Jan 2023

Défense

Digital Production Manager, AI transformation and adoption · Imagence

- **Leading the agency's AI transformation (since 2026):** adoption strategy, choice of tools and models, coaching and upskilling of the teams.
- **Roll-out of AI assistants to all staff:** Teamleader connector (see Projects), packaging and installation guides for non-technical profiles, automated updates; decision document weighing identity, traceability and read-only by default.
- **Multi-project production management:** planning, resource allocation, trade-offs, scoping and estimates across a portfolio of some twenty web, mobile and print projects (Carac, CFDP, Daiichi Sankyo, Entraid, Margo, Estaca, La Revue du Praticien, IPECA, MedOK).
- **Management of internationally distributed teams:** day-to-day coordination of in-house developers and offshore contractors across several countries and time zones; up to 8,900 commits and 12 contributors on a single client project.
- **Hands-on technical lead:** front-end development of the Orchard Core theme for Carac.fr (Razor templates, SCSS, JavaScript); technical audits and critical reviews of existing platforms (MedOK MHN, ALK patient platform).
- **Approach validated in real production:** four products shipped personally with AI assistance (see Projects) to establish the achievable throughput and its limits before generalizing the method to the teams.
- **Technology decisions and hiring** of technical profiles; permanent interface between sales teams, clients and production.

Environment Drupal, WordPress, .NET / Orchard Core, React, Next.js, Python FastAPI, PostgreSQL, Docker, Azure DevOps.

Project Manager · Imagence

- **End-to-end delivery of major redesigns** in social protection and healthcare (Chorum, CBP, Intégrance, ALK Boutique, Evolis / IPECA): requirements gathering, specifications, planning, acceptance testing and go-live.
- **Coordination of multidisciplinary teams and external contractors** on projects spanning several thousand commits and multi-year life cycles.
- **Day-to-day client relationship** (steering committees, reporting, priority trade-offs, contractual scope) and **compliance requirements** of the mutual insurance and healthcare sectors: accessibility, GDPR, security of member areas.

alongside the
project manager
role

Lead Front-End Developer · Imagence

- **Front-end technical lead for the agency:** framework choices, coding standards, code reviews and front-end architecture decisions.
- **Mentoring and upskilling** of front-end developers, in-house and offshore.
- **Interface development for strategic projects** (Sparadrap, MedOK, AIS): responsive integration, accessibility, performance.

Webmaster · Imagence
— Administration, updates and community management of client websites; content production, HTML/CSS integration and editorial quality control.

AI PROJECTS AND ACHIEVEMENTS 2026

Jun → Aug 2026
Imagence,
software vendor

IM.data — sovereign on-premise AI platform
Design and development of a conversational search platform over a governed document corpus, deployed inside the client's perimeter. React / TypeScript, Python FastAPI, PostgreSQL. Microsoft Entra ID SSO and generic OpenID Connect with signature validation, role-based access control, encryption of secrets at rest, pluggable connectors, native source traceability. **251 commits in 2.5 months.**

May → Jun 2026
rolled out to all
staff

Teamleader — AI connector to the agency CRM (MCP server)
Reverse engineering of the internal Teamleader Orbit API, which has no public REST interface (9 modules, browser session replayed automatically). Python MCP server exposing ~65 typed tools to Claude Desktop and Cowork: natural-language reads of the CRM and, on explicit opt-in, creation of quotes, projects and activities. Two-layer mutation guard, dry-run mode, audit log, “AI-generated” marker on created records; 85 unit tests. **One-click installer for non-technical staff** (Python and Tailscale installed automatically, personal URL, auto-start, one-click update) and **decision document comparing three deployment models.**

Aug 2026
product scoping

Tender — multi-tenant SaaS for public tender responses
Full product scoping: 12 specification documents, architecture decision records (ADR), 81-table data model, multi-vendor LLM abstraction, multi-tenant isolation tested against a real PostgreSQL. **Sourced market study showing that the differentiator written into the brief no longer was one**, which led to repositioning the product.

Jun 2026
migration

MeilleurTaux — WinDev to Python / React
Rewrite of a mortgage brokerage application: 12 business collections ported from WLanguage, APR, zero-rate loan and monthly payment calculations, FastAPI back end, React front end, **720 automated tests**, Docker + Caddy + Alembic migrations.

SKILLS

PRODUCTION MANAGEMENT

Multi-project portfolio, internationally distributed teams, estimates, budget tracking, quality assurance, technical hiring.

AI TRANSFORMATION

Adoption strategy, change management, roll-out of AI assistants to staff, access governance and usage traceability, team upskilling.

PRODUCT ENGINEERING

Scoping, functional specifications, ADRs, data modeling, application architecture, security and GDPR by design, agile methods.

APPLIED AI

AI-assisted development in production, MCP servers, multi-vendor LLM pipelines, source-traced retrieval (RAG), model evaluation and selection.

TECHNICAL

- React / TypeScript
- Next.js
- Python FastAPI
- .NET / Orchard Core
- Drupal
- WordPress
- PostgreSQL
- Docker
- Azure DevOps CI/CD
- HTML5 / CSS / SCSS
- JavaScript / jQuery
- Accessibility

TOOLS

Jira, Confluence, Figma, Slack, Teamleader, Git / Azure DevOps, Claude Code, Adobe Illustrator, Adobe Photoshop.

SECTORS

Mutual insurers and social protection, healthcare and pharma, e-commerce, publishing, higher education.
